**Plaintiff(s)/Applicant(s):** IN THE MATTER OF THE BANKRUPTCY OF Mississauga Metals & Alloys Inc.

**Counsel:** Chris BURR for Canadian Nuclear Safety Commission, and Meena ALNAJAR for replacement trustee PWC, No one else appearing.

---

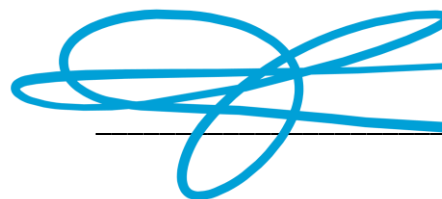

Initially when last before the court, counsel advised me of late breaking concerns from the Ministry of the Environment et al. which have subsequently been addressed to the Ministry's satisfaction and incorporated into the order which is being presented to the court today.

Richter Advisory Group Inc. was the original trustee and now seeks to be discharged. They have stood down on this request until now where PWC has stepped forward as the new trustee.

The replacement of trustees suggested preserves the status quo and is the best solution in the circumstances, which will ultimately allow for the desired remediation of the site that can lead to the sale of the property in due course.

The removal and replacement of trustee is aligned with the two-step process set out in the BIA.

The draft order inclusive of declarations and limitations of liability is submitted on consent of some and unopposed by others of the service list and has been signed this day.
